## Education

**PhD** 2020  
University of California, Davis  
Anthropology; Population Biology; Data Science & Informatics

**BA** 2013  
Vanderbilt University  
Earth & Environmental Sciences (EES); Ecology, Evolution & Organismal Biology (EEOB)  
Departmental Honors in EES, *summa cum laude* overall

## Projects

### Dissertation Work

- Developed and implemented more efficient algorithms for phylogenetic likelihood computation, mixing over the space of correlation matrices, and modularizing particular matrix operations under multivariate Brownian diffusion models of character evolution.
- Extended these models to discrete characters under the multivariate probit and further explored their approximation in the context of truncated biogeographic dispersal. Applied these methods empirically to modern human, catarrhine, and fish datasets, and investigated their statistical performance through extensive simulation experiments.

### Recent Personal Projects

I've developed, fit, interpreted, described, and visualized results from:

- high-dimensional multilevel generalized linear mixed models (GLLMs) in Stan to heart transplant patient immune response data for time-series classification of rejection risk using non-HLA antigens straddling an acute rejection episode.
- multilevel GLMMs in Stan to consumer dietary and attitudinal response datasets measuring the effects of exposure to an advertisement advocating dietary change.
- a hierarchical univariate Ornstein-Uhlenbeck model in Stan to the 'evolution' of nitrogen concentrations in manure ponds across California to predict values after an arbitrary amount of time has passed in an arbitrary pond.
- an efficient, conditional multivariate probit model in R that provides personalized movie rating predictions by exploiting basic properties of Schur complements.
- many dozens of minor scripts (< 100 LOC) devoted to data visualization, text mining, web scraping, replicating published analyses or algorithms from scratch, and exploring off-the-cuff ideas proposed by myself or colleagues.

## Leadership

**Founder & Lead**, Applied Bayesian Statistics Research Cluster 2019 - 2020  
I founded, coordinated, and supervised an interdisciplinary research cluster of 70+ scientists and statisticians across numerous career stages (PhD Student, Postdoc, PI, Industry Researcher), financially and spiritually sponsored by the UC-Davis *Data Science & Informatics* Unit.

**Coordinator**, Various Reading Groups 2014 - 2020  
I've founded and coordinated reading groups on Python, Applied Linear Algebra, Bayesian Data Analysis, and Deep Learning, and frequently consulted on these and other topics for researchers both local and remote. Have also co-run reading groups on Computational Molecular Evolution, Paleoanthropology, Quantitative Genetics, and Machine Learning.

## Languages

**Programming:** R, RevBayes, Stan, BASH, Python, C++  
**Natural:** Russian, English, Spanish

<b>Teaching</b>	<b>Associate Instructor</b> , University of California, Davis (UC-D) <span style="float: right;"><i>2015 - 2020</i></span> I've taught three quarters of an upper-division paleoanthropology course, two quarters of an upper-division evolutionary primatology course, and one quarter of an introductory course on human evolution. In this role, I created or modified all the lab and lecture materials, designed and graded the assignments and tests, mentored students, delivered lectures, and supervised teaching assistants.
	<b>Teaching Assistant</b> , UC-D & Vanderbilt University <span style="float: right;"><i>2012 - 2020</i></span> I've also TA'd for the above, as well as the lab for an introductory cell biology course at Vanderbilt University. Duties here included designing and supervising labwork and lab-related assessments.
	<b>Outreach Lecturer</b> , UC-D <span style="float: right;"><i>2013 - 2020</i></span> I've given multiple yearly talks on human evolution to elementary and middle school students on location and visiting UC-Davis, as well as during campus-wide events (e.g. <i>Picnic Day</i> ). I've also volunteered for various workshops targetted at adults, e.g. on Natural Language Processing during the UC-D Data Science Health Day.
	<b>Course Coordinator</b> , Workshop in Applied Phylogenetics <span style="float: right;"><i>2019</i></span> I served as a course coordinator for a world-renowned, widely-attended, week-long workshop in applied computational Bayesian phylogenetics held in May 2019 at the Bodega Marine Laboratory.
	<b>Carpentries Instructor</b> <span style="float: right;"><i>2019</i></span> I have completed Instructor Training and Checkout for The Carpentries organization and am fully certified to teach courses in the Data and Software Carpentries. I have integrated techniques learned here into my own teaching on e.g. Bayesian statistics & phylogenetics.
<b>Field &amp; Labwork</b>	<b>Archaeological / Paleontological Excavator</b> <span style="float: right;"><i>2013</i></span> During this summer field season I helped in excavation efforts ongoing at La Ferrassie, a Neandertal archaeological and paleontological site in Savignac-de-Miremont, France.
	<b>Water Quality Analyst</b> <span style="float: right;"><i>2011</i></span> I performed water quality analyses (of salinity, reactive nitrogen concentrations, etc.) of a large set of streams distributed across the North Island of New Zealand.
	<b>Stable Isotope Ecologist</b> <span style="float: right;"><i>2012 - 2013</i></span> As an undergraduate researcher, I examined how environmental and ecological conditions were recorded in enamel stable isotope ratios (carbon and oxygen) and dental microwear textures for several marsupial taxa throughout Australasia.
<b>Grants &amp; Awards</b>	Crook Travel Award <span style="float: right;"><i>2018</i></span>
	1st Place Picnic Day Exhibit Award in "Secrets of Nature" Category <span style="float: right;"><i>2017</i></span>
	Outstanding Graduate Student Teaching Award Nomination <span style="float: right;"><i>2016, 2019</i></span>
	Summer Research Grant <span style="float: right;"><i>2015</i></span>
	NSF Graduate Research Fellowship <span style="float: right;"><i>2015</i></span>
	Summer Research Grant <span style="float: right;"><i>2014</i></span>
	Graduate Scholars Fellowship <span style="float: right;"><i>2013</i></span>
	Departmental Honors in Earth and Environmental Sciences <span style="float: right;"><i>2013</i></span>
	Eugene H. Vaughan Undergraduate Research Assistantship in Geology <span style="float: right;"><i>2012</i></span>
	Geology Travel Grant <span style="float: right;"><i>2012</i></span>
	Vanderbilt Undergraduate Summer Research Grant <span style="float: right;"><i>2012</i></span>
	Ross Family Scholarship <span style="float: right;"><i>2012</i></span>
	National Merit Scholarship <span style="float: right;"><i>2009</i></span>
